

D-CAD

Lets start with a Professional & Live-Work
education & training program...

Directed & Lead By

Wellborn Software Pvt. Ltd.

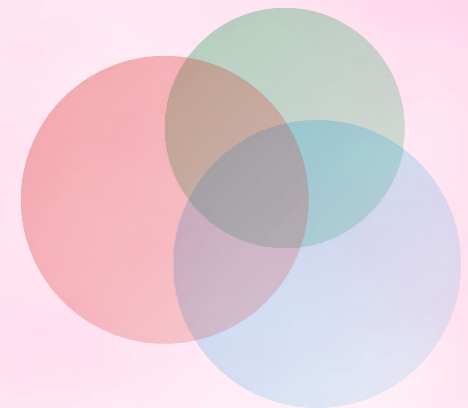

Bringing learning choice for students
& building career growth in IT

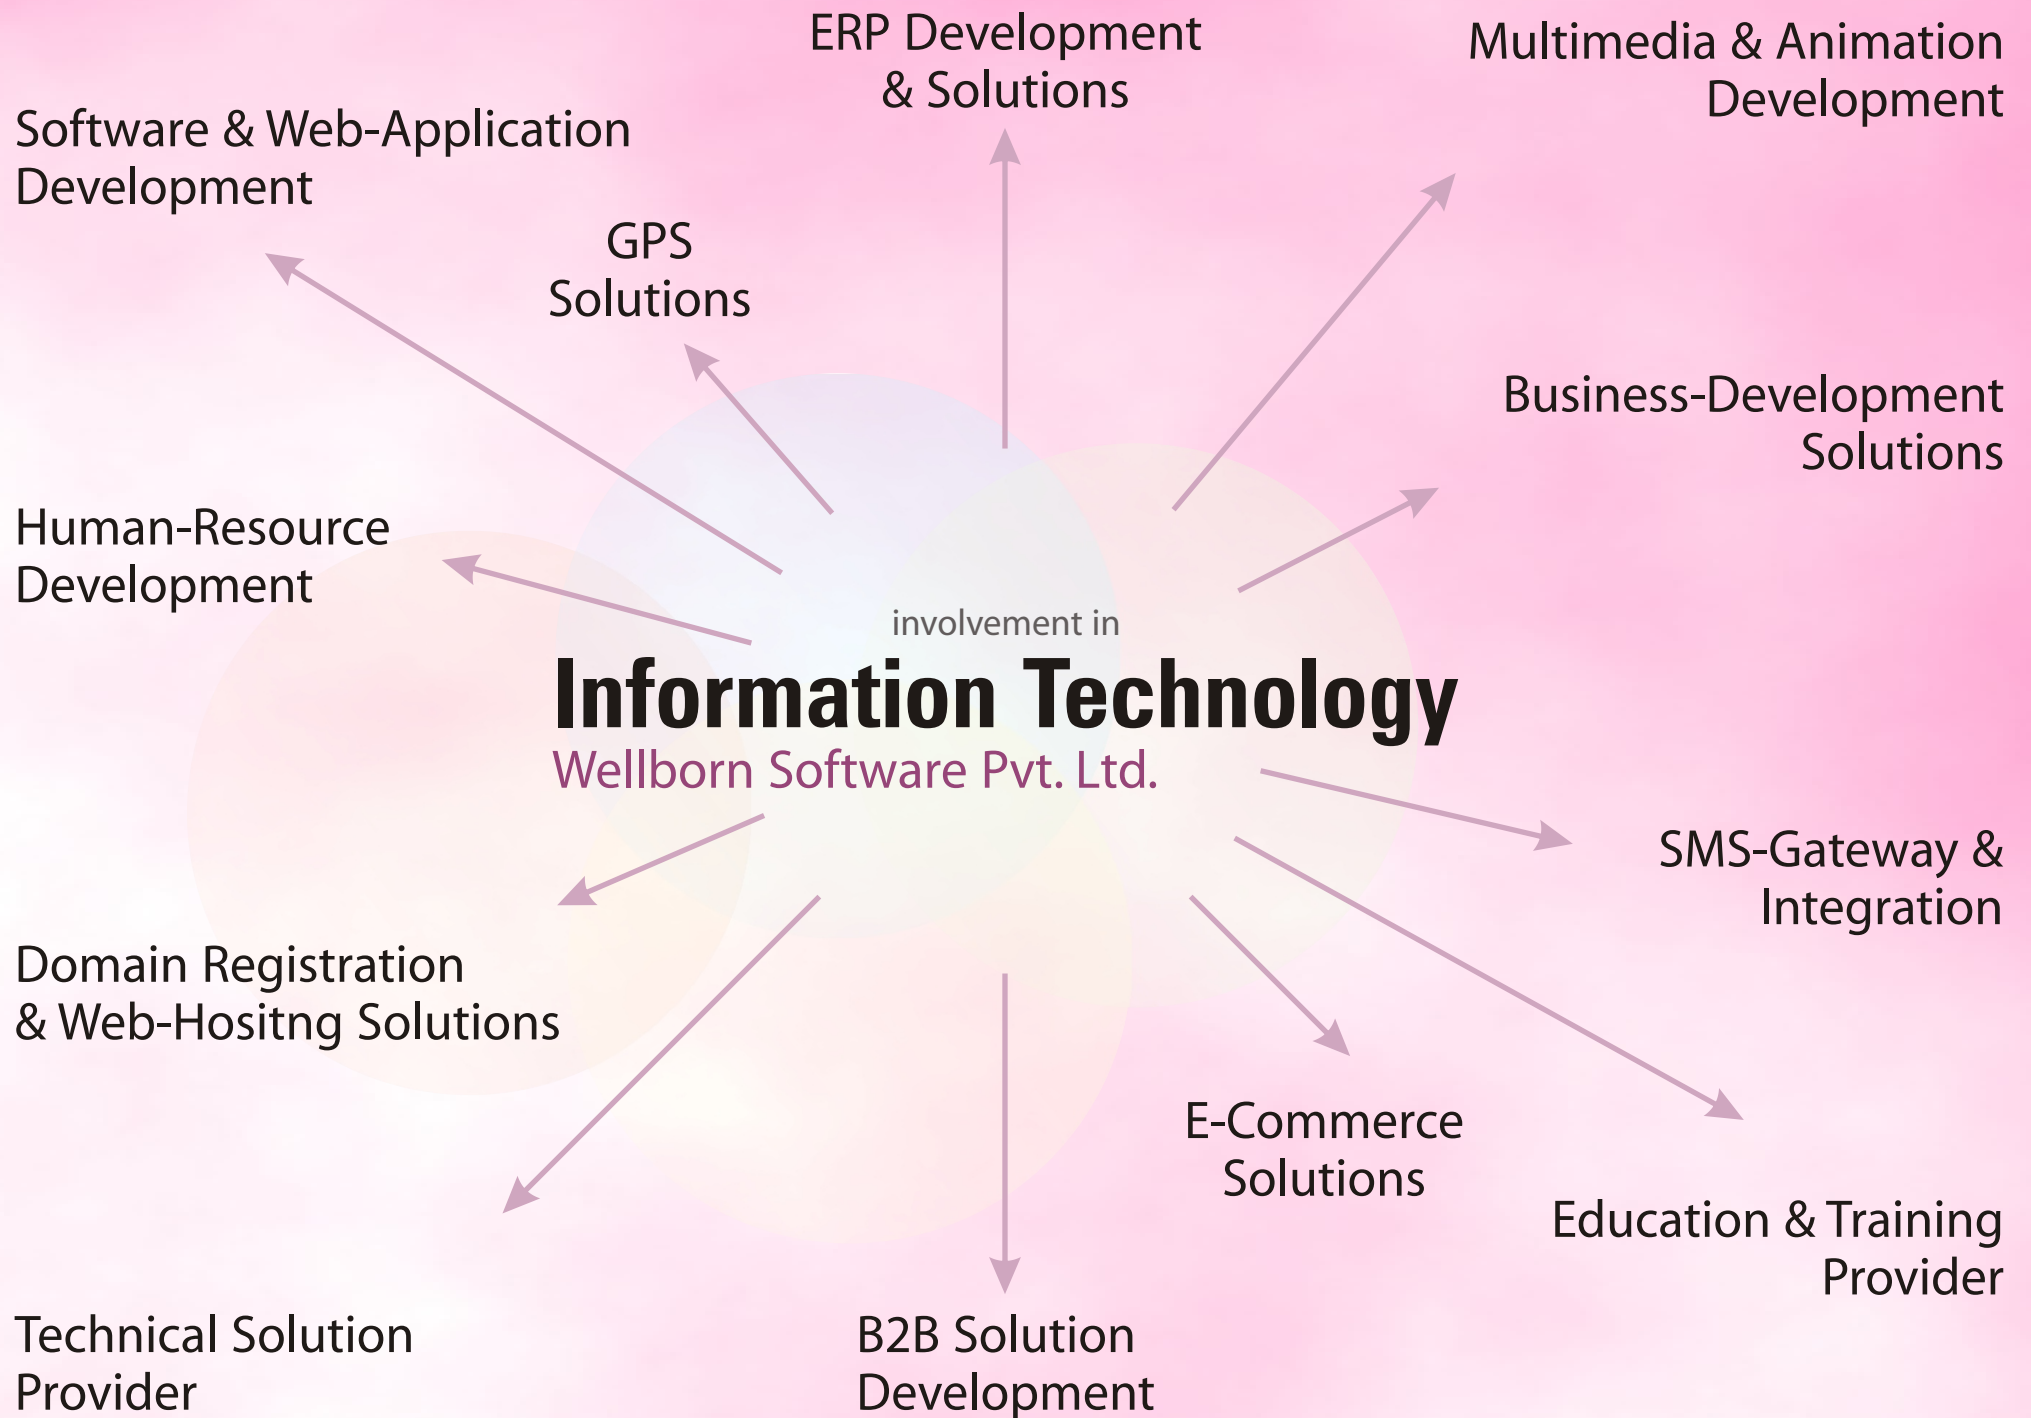

Proud to be Wellborn...

Information Technology has become very sound in past few decades and it does not need any type introduction in any area or personal and commercial units. Today's thousands of applications are developed for each and every fields for their specialized area of working and requirement goes very huge for the next-level of achievement.

There are very fewer institutions which provide both Professional & Live-Work education and training program; Very proudly says, Wellborn Software is one of them.

D-CAD?

D-CAD is an IT Training Program that helps the students to develop all their skills and expertise in the field of Computer Application, Web-Development, Database Management and Multimedia Development. It covers approx all the dimension of IT applications.

All the phases increases the toughness, quality and essential elements in our candidates to being a perfect human-resource for the esteemed post.

We believe in D-CAD and we believe on its success.
